

Technology and communications workplace snapshot

Industry overview

Tech organizations need workplaces that evolve quickly, support innovation, and attract top talent.

Flexibility, culture, and connection continue to shape the expectations of engineering, product, and creative teams.

This snapshot shares GWI 2025 insights highlighting what tech teams need from the workplace today.

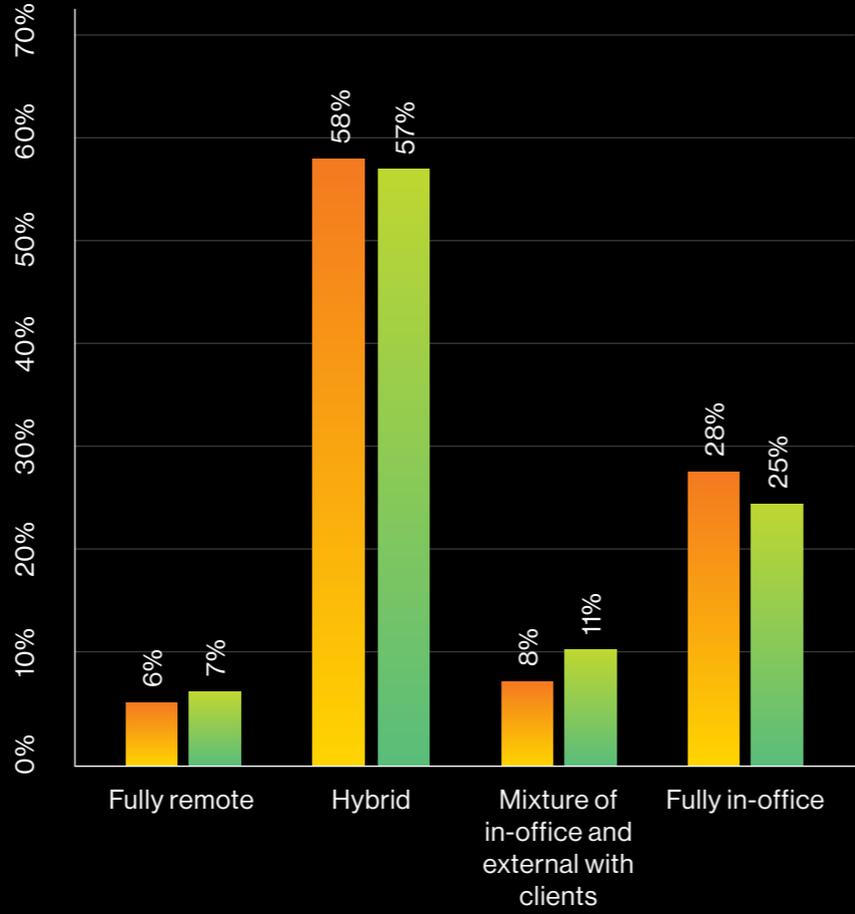

“The team helped us look into the future and create a space that would function for our rapidly growing company. We are so happy with the results now that we have lived in the space for a while. I would highly recommend working with Unispace for your expansion project.”

Insight narrative:

Tech teams want workplaces that feel dynamic, social, and purpose-built.

Spaces must support rapid iteration, hybrid workflows, and cross-functional collaboration.

Global average (all industries)

Industry average (Technology and Communications)

What this means for your workplace

- 01 Build agile, reconfigurable work zones
- 02 Prioritize high-quality collaboration spaces
- 03 Strengthen culture through communal hubs
- 04 Improve knowledge-sharing through adjacency planning

WHY UNISPACE

We help global tech brands create workplaces that unlock creativity and connection. Our unified approach accelerates delivery and reduces risk.
